

# Dominion® KX IV-101 Firmware Release Notes

**Firmware Version:** KX IV – 101 4.5

**Release Status:** General Availability (GA)

**Date:** September 17, 2025

## Dominion KX IV-101 Overview

The KX IV-101 is Raritan’s enterprise KVM-over-IP switch family. Featuring a modern hardware design with increased computing power and storage, the KX IV-101 provides KVM-over-IP access for IT administration, as well as high performance IP access for broadcast, control rooms, labs, and other dynamic applications. The optional Dominion Enhanced User Stations (DKX3-EUST and DKX4-EUST) provide high performance access for studios, labs, and control rooms.

## Release 4.5 Firmware Overview

Dominion KX IV-101 Release 4.5 is a General Availability (GA) Release for applicable KX IV-101 products groups. This release may include performance and productivity improvements, support for new products and accessories, new features and enhancements, bug fixes, security fixes, and general fixes for specific model families. Specific updates are outlined below.

## Important Note

KX4-101 users must be running Release 4.1 or later to upgrade to 4.5

<i>Firmware Version</i>	<i>Upgrade Steps</i>
4.1 or later	» 4.1 or later » 4.5

Please contact technical support with any questions or issues.

## General Guidelines for this Release

Please check the **Support & Compatibility** section below. Or contact Raritan Support if you are unsure of the model number of your unit—it is typically viewable from the GUI’s *Device Information* page and is also printed on a label located on the device.
